Cybercrime Case Study — Phishing Attack

Prepared by: Atharva Desai | 25BCE10123

Course: CSE0001 — Digital Literacy | VIT Bhopal

What is Phishing?

Phishing is a type of cybercrime where an attacker pretends to be a trusted person or organisation to trick the victim into giving away sensitive information like passwords, OTPs, or bank details.

How It Happens

Attacker sends a fake but professional-looking message

Creates urgency (account blocked / selection confirmed)

Victim clicks link to fake website

Victim enters credentials

Attacker gains access and misuses data

Consequences

Financial loss, identity theft, account hacking, and emotional distress.
