# DIGITAL LITERACY

*What Every Student Should Know*

Atharva Desai | 25BCE10123 | CSE0001 – Digital Literacy | VIT Bhopal

01

# What is Digital Literacy?

### More than just using apps

It means understanding WHY and HOW digital tools work, not just clicking buttons.

### Awareness of consequences

Every post, click, and share has an impact on your privacy, reputation, and safety.

### Critical thinking online

Questioning what you read, verifying sources, and not following the crowd blindly.

### Responsible digital identity

Managing how you present yourself online with honesty and professionalism.

02

# Useful Digital Tools for Students

### Canva

Create posters, infographics, and presentations — free and browser-based

### LinkedIn

Build your professional profile visible to recruiters and employers

### GitHub

Store your code, track changes, and build a public portfolio of projects

### HackerRank

Practice coding challenges and earn skill certificates for free

### Google Docs

Write, collaborate, and share documents with your team in real time

03

# Safe Internet Practices

- Never share your OTP or password with anyone — not even people claiming to be from your bank
- Always verify the sender's email address carefully before clicking any link
- Enable 2-Factor Authentication (2FA) on all important accounts
- Think before you post — everything you share online stays permanently
- Use different passwords for different accounts to limit damage if one is hacked

04

# Professional Email Etiquette

## DO

- Write a clear subject line
- Start with Dear Sir / Ma'am
- Keep it polite and structured
- End with Regards + your name
- Give context and background

## DON'T

- Send one-line casual messages
- Write 'Send asap' to professors
- Skip the subject line
- Use informal language or slang
- Forget your name and roll number

# Thank You

*Be safe. Be aware. Be digitally literate.*
